

## Helpful Information About Your AM Advantage

Remember that no antenna can receive a radio signal that isn't there. When a usable radio signal is present, your AM Advantage will improve AM reception.

Note: Generally, a practical limit to radio reception is 40-50 miles from the broadcast transmitter depending on the terrain.

### Common Questions

Q: Which wire on the AM portion of the antenna is the ground wire?

A: Either wire can be used as the ground.

Q: When I touch the antenna, it works better. How come?

A: When you touch the antenna, and your feet are touching the ground, you are acting as a giant antenna. You can only accurately judge how the antenna is working when you let it go.
