

## Helpful Information About Your AM/FM Tower

TOWER

Remember that no antenna can receive a radio signal that isn't there. When a usable radio signal is present, your **AM/FM Tower** will improve AM and FM reception.

Note: Generally, a practical limit to radio reception is 40-50 miles from the broadcast transmitter depending on the terrain.

Gain Control Knob:

Located on the front of the **AM/FM Tower** is the gain control knob. The gain control is the mechanism which either increases or decreases the antenna's amplifier intensity. The further away you are from the radio signal, the more you increase the gain. If you are very close to the radio signal, signal saturation occurs, lowering the gain will decrease the amount of distortion. See Fig. 4.

## Limited Warranty

Audiovox Corporation (Audiovox) warrants this product against defects in materials or workmanship for one (1) year from the date of purchase. During this period, this product will be replaced without charge. This warranty does not cover any damage due to acts of nature, commercial use, accident, misuse, abuse or negligence. This warranty is only valid in the USA. Replacement as provided under this warranty is the exclusive remedy of the consumer. Audiovox shall not be liable for any incidental or consequential damages for breach of any express or implied warranty on this product, except to the extent that limitations of this sort are prohibited by applicable law. **THERE ARE NO IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURCHASE EXCEPT TO THE EXTENT THAT IMPLIED WARRANTIES OR EITHER SORT ARE REQUIRED BY APPLICABLE LAW, AND IN SUCH CASE, EACH WARRANTY IS LIMITED IN DURATION TO THE ONE YEAR.**

## Common Questions

- Q: My TERK antenna does not work with my boom box. What can I do?  
 A: You can only use a TERK antenna on a system where there is an input for an external antenna. Some portable boom box radios do not have such an input.
- Q: Can I extend the wire on my FM antenna to place it on a window sill or somewhere away from my receiver?  
 A: You can extend the wire with RG-59 cable and a two-way F connector. These items are available at any electronics store.
- Q: When I touch the antenna, it works better. How come?  
 A: When you touch the antenna and your feet are touching the ground, you are acting as a giant antenna. You can only accurately judge how the antenna is working when you let it go.
